Saison De Kaya

Style: Belgian Ale / Saison

This beer is the epitome of the Saison style... dry, refreshing, phenolic, & bubbly. While this recipe isn't a clone of any specific commercial brew, it's a great, easy to drink example for people who love beer like Dupont, Hennepin, etc.

Ingredients

<u>GRAINS</u>	<u>AMOUNT</u>	<u>EXTRACTS</u>	<u>AMOUNT</u>	<u>HOPS & SPICES</u>	<u>AMOUNT</u>
Flaked Wheat	6 oz.	Super Light	2.33 qts.		
Aromatic	5 oz.	Cane Sugar	1.0 lb.		
				<u>Bittering Hops</u>	
				Hallertau	2.0 oz.
				<u>Finishing Hops</u>	
				Hallertau	0.66 oz.
				Whirlfloc	1 Scoops

Yeast Type: Belgian Saison **Yeast Description:** Earthy, peppery notes. Leaves beer slightly sweet.

Brewing Instructions

- 1 Make sure your kettle is between 160° - 170°. Place all crushed grains into a grain sock and steep in the pot for 30 minutes, making sure to maintain the temperature indicated. After grains have steeped, drain and discard sock.
- 2 Raise the heat under your pot. When the temperature is approaching 200°, add all of your extracts and sugars (except the priming sugar!). Stir well. Wait for pot to reach a boil. **NEVER LEAVE YOUR POT FROM THIS POINT ON!**
- 3 When kettle reaches a boil, temporarily turn the heat off and add your bittering hops. Immediately return to a heavy, rolling boil for 60 minutes. Make sure to stir your wort regularly throughout the brewing process so it doesn't scorch.
- 4 When there is 15 minutes left in the boil, temporarily turn off your heat again and add your finishing hops. Return to a light boil. Any spices or special ingredients are typically added now (refer to ingredient list above).
- 5 After last 15 minutes of boiling, turn heat off and chill wort. When wort is around 70°- 90° pour into a fermenter and pitch yeast. That's it! Refer to more detailed brewing and bottling instructions if needed (available upon request).

Recipe will yield approximately 2 cases of 22 oz. or 12 oz. bottles. Brewing, fermenting, and conditioning times may vary depending on recipe, yeast, temperatures, and brewing experience.
